

Aim: To seek to improve our environmental performance and reduce the environmental impact of our installed works through sound business practices and employee engagement

NA Curtain Walling are building envelope specialists providing manufacture, installation and maintenance of curtain wall and cladding systems.

NA Curtain Walling Ltd is committed to greater eco-efficiency in its business practices and in support of this has documented and implemented an environmental management system (EMS) meeting requirements of ISO 14001.

The EMS ensures that we minimise negative environmental impacts arising from our construction operations and business activities. It supports our commitment to improve our environmental performance and protect the environment.

Our environmental objectives are focused on:

- Promoting sound environmental management policies and practices throughout the Company
- Demonstrating compliance with legal and other relevant requirements applicable to our business.
- Seeking efficient and environmentally responsible use of resources such as materials, energy and water
- Minimising waste through application of the waste hierarchy i.e. Eliminate, Reduce, Reuse, Recycle.
- Minimising transportation impacts by co-ordinating business mileage to maximise fuel efficiency
- Raising staff and contractor's awareness of our significant environmental impacts and to promote individual good practice.
- Working with our clients to help design efficient new buildings

We are committed to effective environmental management. To support this aim we will monitor our performance and work in conjunction with our staff and supply chain to ensure the requirements of this Policy are fully implemented.

Robbie Welch
Exec. Director
